PATENT COOPERATION TREATY

PCT

REC'D 24 JUN 2005

INTERNATIONAL PRELIMINARY REPORT ON PATENTARY LITY
(Chapter II of the Patent Cooperation Treaty)

PCT

(PCT Article 36 and Rule 70)

Determination Policy Priority date (day/month/year) Priority date (day/month/year) Priority date (day/month/year) Priority date (day/month/year) O2.04.2003	1	T							
International application No. PCT/SE 2004/000526 International Patent Classification (IPC) or national classification and IPC CO7R 7/08, G01N 33/564 Applicant Pharmacia Diagnostics AB et al 1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 2. This REPORT consists of a total of sheets, including this cover sheet. 3. This report is also accompanied by ANNEXES, comprising: a (sent to the applicant and to the International Bureau) a total of sheets, as follows: sheets of the description, claims and/or drawings which have been amended and are the basis of this report administrative instructions). sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box. b (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions). 4. This report contains indications relating to the following items: Box No. II Priority Box No. IV Lack of unity of invention Box No. VI Certain defects in the international application Date of submission of the demand Date of completion of this report Date of submission of the demand Date of completion of this report 13.06.2005	Applicant's or agent's file reference	FOR FURTHER ACTIO	R FURTHER ACTION See Form PCT/IPEA/416

PCT/SE 2004/000526

Box	No. I	Basis of the report							
1.	. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.								
	This report is based on a translation from the original language into the following language which is the language of a translation furnished for the purposes of:								
		international search (under Rules 12.3 and 23.1(b))							
		publication of the international application (under Rule 12.4)							
		international preliminary examination (under Rules 55.2 and/or 55.3)							
2.	furnish	ith regard to the elements of the international application, this report is based on (replacement sheets which have been raished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):							
		the international application as originally filed/furnished							
	\boxtimes	the description:							
		pages 1-21 as originally filed/furnished							
		pages* received by this Authority on							
		pages* received by this Authority on							
	\boxtimes	the claims:							
		pages as originally filed/furnished							
		pages* as amended (together with any statement) under Article 19 pages* 22-25 received by this Authority on 03-06-2005							
	\boxtimes	the drawings: pages 1-7 as originally filed/furnished							
		pages 1-7 as originally filed/furnished pages* received by this Authority on							
		pages* received by this Authority on							
		a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.							
3.		The amendments have resulted in the cancellation of:							
		the description, pages							
ļ		the claims, Nos.							
Ì		the drawings, sheets/figs							
		the sequence listing (specify):							
		any table(s) related to the sequence listing (specify):							
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not bee made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rul 70.2(c)).							
1		the description, pages							
		the claims, Nos.							
		the drawings, sheets/figs							
1		the sequence listing (specify):							
		any table(s) related to the sequence listing (specify):

Cited document:

D1: WO9911667A1

Document D1 is considered to represent the closest prior art. This document relates to a method for producing peptides containing methylated arginines (see the abstract). methylation is essential for the reaction with antibodies in systemic from patients suffering from erythematosus (SLE). Sequence 19 relates to a peptide with 23 amino acids (part of SdD3). Position 112 can advantageously be dimethylated (see page 12, line 20 - page 13, line 3). There are also other peptides of different length, for instance sequences 5 and 6, which are 15 and 16 amino acids long respectively. The peptides can be used in a diagnostic kit (see the claims).

The invention according to claim 1 differs from D1 in that the arginine is symmetrically dimethylated. D1 discloses arginine residues that are preferably dimethylated in an asymmetrical way.

The effect of the difference is according to the applicant that the peptides are capable of detecting a highly specific subpopulation of anti-Sm antibodies which are exclusively present in patients with SLE. In D1 it has not been shown that the peptides described are capable to discriminate between SLE patients and patients suffering from other related and unrelated diseases.

Nothing stated in D1 leads the skilled person to a peptide with symmetrical dimethylated arginine. Therefore the invention according to claim 1 involves an inventive step.

. . . / . . .

International application No.

PCT/SE 2004/000526

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: \boldsymbol{V}

For the same reasons, the use according to claim 5, the kit according to claim 14 and the method according to claim 20 involves an inventive step.

Claims 2-4, 6-13 and 14-19 are dependent on claims 1, 5 and 14 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

The invention according to claims 1-20 is also industrially applicable.

International application No.

PCT/SE 2004/000526

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The subject matter of claims 1, 4, 12, 14-16, 19 and 20 is not sufficiently defined. It does not contain the amino acid position arginine of: the dimethylated sequence orcombination with sequence name. These features are necessary to solve the technical problem with which the application is been shown in (Article 6). It has not concerned application that all the peptides in claims 1, 4, 12, 14-16, 19 and 20 have the desired properties. From the wordings of the present claims, the skilled person would therefore not know which of the peptides he would have to select to obtain the desired effect.

0 3 -06- 2005

PCT/SE2004/000526 Amended claims 2005-06-01

- 1) A peptide (S33) containing 15-16 amino acids, comprising symmetrical dimethylated arginine (sDMA), that is able to react with antibodies which are present in sera from patients with systemic lupus erythematosus (SLE).
- The S33 peptide according to claim 1 comprising the amino acid sequence AARGsdRGRGMGRGNIF.
- 3) A peptide according to claims 1 and 2 where the dimethylated arginine has the position 112 in the polypeptide sequence of SmD3.
- 4) The peptide according to claims 1 or 2 or 3, wherein the structure of the symmetric dimethylated arginine is

5) Use of a peptide (S33) containing 15-16 amino acids, comprising symmetrical dimethylated arginine (sDMA), that is able to react with antibodies that are present in sera from patients with systemic lupus erythematosus (SLE) for the manufacture of a composition for diagnosis of SLE patients.

0 3 -06- 2005

PCT/SE2004/000526 Amended claims 2005-06-01

- 6) Use according to claim 5, wherein the diagnosis is differential diagnosis to distinguish between SLE patients and patients with mixed connective tissue disease (MCTD).
- 7) Use according to claim 5, wherein the diagnosis is an in vitro diagnosis of SLE.
- 8) Use according to claim 5, wherein said composition is used for in vitro monitoring of the disease activity of dsDNA negative SLE patients.
- 9) Use according to claim 5, wherein said composition is used for differentiation between SLE and MCTD.
- 10) Use according to any of claims 5 to 9, wherein said peptide comprises the amino acid sequence

AARGsdRGRGMGRGNIF

- 11) Use according to any of claims 5 to 10 where the dimethylated arginine has the position 112 in the polypeptide sequence of SmD3.
- 12) Use of a multimer peptide comprising the peptide of claim 1.

0 3 -06- 2005

PCT/SE2004/000526 Amended claims 2005-06-01

13) Use according to any of claims 5 to 12, wherein the structure of the symmetric dimethylated arginine is

- 14) A kit for detection of antibodies, comprising a peptide (S33) of 15-16 amino acids of which one is a symmetrical dimethylated arginine (sDMA), and is able to react with said antibodies that are present in sera from patients with systemic lupus erythematosus (SLE).
- 15) A kit according to claim 14, wherein said peptide is used for in vitro diagnosis of SLE.
- 16) A kit according to claim 14, wherein, wherein said peptide is used for differential diagnosis to distinguish between SLE and mixed connective tissue disease (MCTD).
- 17) A kit according to any of claims 14 to 16, wherein said peptide comprises the amino acid sequence

AARGsdRGRGMGRGNIF.

PCT/SE2004/000526 Amended claims 2005-06-01

- 18) A kit for use of a peptide according to any of claims 14 to 17 where the dimethylated arginine has the position 112 in the polypeptide sequence of SmD3.
- 19) A kit according to any of claims 14 to 18, wherein the structure of the symmetric dimethylated arginine is

20) A method for monitoring a disease activity comprising repeated testing to follow the titer of antibodies able to react with the peptide according to any of claim 1-4 in order to monitor the effect of treatment or the disease activity.
